

Experience**Harvard University** - Software Engineer 2017-2021

Helped teach and support 3+ intro-level CS and programming classes, including CS50, Harvard's largest CS class with 700+ students on campus and 1M+ registrants online. Built and maintained tools used by tens of teachers, hundreds of students on campus, and tens of thousands of students online. Mentored groups of students while they worked on dev projects.

HST - Software Engineer 2015-2016

Built websites for different company product lines. Worked with a team of 3 developers on Android apps that integrated with the company's hardware products (e.g., security cameras, electronic gates, etc) and APIs. Implemented custom solutions for other companies and organizations.

Projects**CS50 IDE** - A cloud-based IDE based on AWS Cloud9

Designed and built the infrastructure backend and the orchestration of compute and storage on top of Docker, Kubernetes, Amazon EFS, and other tools and services, optimizing for cost and resources and speeding up the IDE's loading time by at least 6x. Built a set of JavaScript plugins that simplify and customize the look and feel of the IDE, making it more accessible to students with no prior programming experience.

publish50 - An electron app for facilitating video production workflows

Designed and built an Electron app with a ReactJS frontend that helped CS50's production team by streamlining the transcoding of terabytes of videos, using FFmpeg, and publishing the generated assets to YouTube and the course's CDN, backed by S3 and CloudFront, speeding up the production time of a single video by at least 5x.

debug50 - A wrapper for the Cloud9 debugger

Improved the underlying gdb interface and added support for debugging Python 3 programs by integrating ikp3db.

Other work

Helped develop, dockerize, and configure CI/CD pipelines for many teacher- and student-facing apps (e.g., auto-testing/grading, submission tools, etc) to different services (e.g., EB, ECS, EKS, Heroku, etc). Supported teachers and students with different technical issues.

Education

Audited many CS and programming classes online and at Harvard Extension School.

Helwan University '17 - Bachelor's degree in Accounting

Languages

Bash, C, Java, JavaScript, PHP, Python.
